

Shannon Kueneker

Senior Experimentation Engineer / MEAN Stack Developer | San Diego, CA

slkueneker@gmail.com | 858.705.3762 | [linkedin](#) | [portfolio](#)

Professional Summary

Senior Experimentation Engineer with deep expertise in building, coding, and validating large-scale A/B, multivariate, and personalization tests across Optimizely, Maxymiser, and Adobe Target. Known for translating business goals into technical solutions, engineering high-quality test experiences, and developing internal tools that streamline workflows and elevate experimentation maturity across organizations.

Core Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, jQuery, Python

Experimentation Platforms: Optimizely, Maxymiser, Adobe Target

Frameworks/Tools: Angular, Node.js, Git, REST APIs, Express.js, Next.js, MongoDB, Appian, Jest, Angular CLI

Specialties: A/B & MVT development, personalization logic, QA, cross-browser debugging, responsive web design, test driven development (TDD), MEAN stack development

Additional: Internal tooling, dashboard creation, documentation systems, workflow automation, Sharepoint

Professional Experience

USAA — Digital Optimization Developer, Senior

Sep 2019 – Present · Remote (San Diego, CA)

- **Engineer end-to-end experiments** by coding A/B, multivariate, and personalization tests and performing full QA to ensure accuracy, stability, and compliance.
- **Translate business requirements** into detailed technical specs and implement test logic using HTML, CSS, JavaScript, and jQuery.

- **Lead technical training** for IT developers on experimentation engineering, platform usage, and best practices.
- **Conduct peer code reviews** and validate test setups pre-launch to ensure alignment with technical specifications.
- **Troubleshoot complex issues** and provide engineering guidance to dev teams across experimentation platforms.
- **Develop internal tools**, dashboards, and workflow automations to streamline documentation and testing processes.
- **Maintain technical documentation** for experimentation tools, integrations, and platform bugs.
- **Serve as platform SME** for experimentation platforms, advising on feasibility, integrations, and advanced use cases.
- **Build internal web solutions** including custom dashboards, internal sites, and business tools supporting cross-functional teams.

USAA — Digital Optimization Developer I

Apr 2018 – Sep 2019 · Remote

Oracle Maxymiser — Solutions Engineer

July 2013 – April 2018 (NYC and remote)

- **Engineered A/B and multivariate tests** using JavaScript, jQuery, HTML, and CSS, delivering high-quality, cross-browser experiences.
- **Applied experimentation and personalization best practices** to ensure statistically sound and scalable implementations.
- **Delivered custom technical solutions** for complex campaigns, integrations, and advanced targeting use cases.
- **Provided technical support** to clients and Client Services teams, resolving issues and guiding implementation strategy.
- **Troubleshoot platform and code issues** across environments, ensuring stability and timely resolution.
- **Ensured cross-browser compatibility** and performed rigorous QA for all experiment builds.
- **Trained teams on Maxymiser** platform usage, coding standards, and best-practice patterns.
- **Provided product feedback** on new features, enhancements, and user-experience improvements.
- **Led the self-serve Solutions Engineering team**, driving technical excellence and scalable experimentation workflows.

Mind Movies — Front-End Development Intern

Jan – Apr 2013

- **Built marketing and sales webpages** from spec using clean, standards-based HTML/CSS.
- **Resolved cross-browser and device issues** to ensure consistent user experiences.
- **Enhanced existing functionality** through PHP, JavaScript, and database updates.
- **Performed video encoding** and integrated multimedia assets into site experiences.
- **Manipulated databases** to support content and feature updates.

Certifications

- Web App Development (Python) — Cornell University
- SAFe 5 Product Owner / Project Manager — Scaled Agile

Education

- BS in Web Development – Bellevue University, Bellevue, NE
- BA in Criminology & Justice Studies – California State University – San Marcos, San Diego, CA
